

4th ECVSMR Scientific Meeting – 20-22 July 2023

- **Dr. Hélène Pasquet**

DVM, DESV pathologie locomotrice des équidés
DE de cinésiologie, physiothérapie et réadaptation vétérinaire-option équine
ISELP certified

After a residency program at CIRALE from 2004 to 2007 to obtain my specialized veterinary studies diploma in equine locomotor pathology under the supervision of Professor Jean Marie Denoix, I established my private equine practice near Clermont-Ferrand in Auvergne in 2007. I gradually developed my activity, becoming certified by Iseip in 2010 and completing over 25 training courses as an instructor in Europe. We are fortunate to have a multidisciplinary team of equine veterinarians and to work in a modern clinic equipped with a significant technical platform. My practice is mainly focused on steeple chase horses and showjumpers, for which I provide high-level sports monitoring. I am particularly focused on diagnosis, using ultrasound in particular, and I love sharing my experience with students and colleagues.
